Lock data
KEMMLIT select electronic RFID lock

KEMMLIT

LOCK FUNCTION

☐ Alternating use | Lock can be operated with alternating user cards | For public deposit boxes

☐ Personal use | Lock has fixed user card | For employee lockers

RFID DATA CARRIER

☐ New RFID transponder

    ☐ Transponder card

    ☐ Transponder chip

    ☐ Transponder sticker

☐ Integrating existing transponder

Compatibility of the existing transponder must be checked.
KEMMLIT will require a test transponder. This test transponder must support Mifare. In case the existing transponder cannot be used, a transponder sticker can be used as an alternative. This sticker can be attached to a time card or smartphone for example.
